1

AT at the End of the School Year

The ATAC Lab uses the summer to inventory our AT, ensure it is working properly and has needed updates. Our top priority is to be sure students have the AT they need when they need it. Please, help us know where all of our AT is so we can start school in the fall ready to meet all students' AT needs.

2

Taking AT Home

If students need AT at home over the summer to work on academic goals, please, have family sign the release to take equipment home found at this QR Code and email it to the ATAC Lab.

3

AT Use at School This Summer

If students need AT for school over the summer, please let the ATAC Lab know what class the student will be in and where the AT should go for the fall start of school.

4

To Save AT for The Fall

The ATAC Lab can hold AT for students in the fall. Just let the ATAC Lab know which student the equipment is for and where they will be at the start of school in the fall and it will be delivered to them updated and ready for the new year.

5

Report Broken/Missing Equipment

The summer is a great time to get all broken equipment repaired and missing equipment accounted for. Please, let the ATAC Lab know where equipment is located and any necessary repairs so it can be attended to during this down time.
